

CHISON
Value Beyond Imaging

SonoMax

Premium Imaging for Exceptional Healthcare

Local Authorized Representative:
IHB Healthcare Sdn Bhd (1136749-P)
15,16,17, Petaling Utama Avenue, Jalan PJS 1/50,
Taman Petaling Utama, 46150
Petaling Jaya, Selangor.

CHISON SonoMax a top-of-the-line cart-based ultrasound system that embodies a perfect blend of style and functionality. Designed with an unwavering attention to detail, its sleek and ergonomic design offers both comfort and exceptional performance. SonoMax delivers the accuracy and versatility medical professionals need to provide the best possible patient care. With its advanced features and intuitive interface, CHISON SonoMax sets a new standard for premium ultrasound systems.

MAX Clarity

FHI+ employs advanced digital signal processing algorithms to significantly improve both resolution and penetration.

MAX Precision

Fine-tune transmit waveforms for multi-frequency energy distribution and precise receive frequency control for image uniformity and contrast resolution.

MAX Performance

Coherence beamforming technology improves SNR via digital signal processing, optimizing signal path, reducing noise, and enhancing signal.

MAX ++
PLATFORM

PREMIUM DESIGN

23.8" large size HD LED screen for higher clarity

15.6" Angle adjustable touch screen

12° tilt keyboard for extreme comfort

Bigger trackball make control with ease

Pinless Port
5 Transducer Connectors with Stylish Lights

Flexible height adjustment with 25CM lifting range

Ease of transportation

Hero Kit

Innovative service solution

GENERAL

SonoContrast

- Developed to visualize the micro-circulation in tissue, that is, the blood flow in imperceptible blood vessels.
- Potentially be used to improve diagnosis and therapy in several clinical situations.
- More sensitive, better performance.

Shear Wave Elastography

- P-SWE point shear wave imaging, high precision singlepoint measurement, higher penetration.
- 2D-SWE surface shear wave imaging, real-time two-dimensional measurement to obtain more diagnostic information.
- The system can provide variety of quantitative analysis parameters, such as velocity values, Young's modulus and so on.

Thyroid, Elastography

Pleural and Abdominal Effusion

Kidney, MVI

Hyperthyroidism, C Mode

Thyroid Nodule, MVI

Liver, MVI

CARDIOVASCULAR

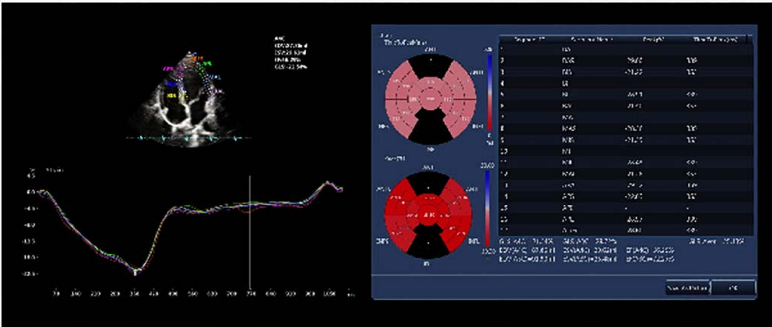

SonoPW

- The sample gate can be extended to 4 during PW mode.
- It can switch and active each sample gate to realize multi-point spectrum measurement in the same cardiac cycle at the same scanning plane ; Support synchronous display of spectrum and speed value.

Strain and Strain Rate

- A new non-invasive method for assessment of myocardial function.
- Ability to differentiate between active and passive movement of myocardial segments, to quantify intraventricular dyssynchrony.
- To evaluate components of myocardial function.

A4C, Auto EF

Four Chambers View, C Mode

TDI-SonoPW

TEE

Pericardial Effusion

SoundFlow

WOMEN'S HEALTHCARE

Volume Flow

- A three-dimensional technology which can provide the real-time visualization of hemodynamics blood flow with a density appearance.

Sono - OB

- Automatically measure: BPD, HC, AC, FL, NT.
- Efficiency and accuracy.

Fetal Face, Virtual HD

Fetus Abdomen, B Mode

Fetus, B Mode

Breast Nodule, NanoFlow

MCA, C Mode

Uterus , 210°

PREMIUM VERSATILITY

Convex probe:

Linear probe:

Trans-vaginal Probe:

Phased array probe:

Volume probe:

Micro convex probe:

Bi-plane probe:
